

SHELTER REPAIRS

WINTERIZATION

With winter weather fast approaching in Lebanon, our first priority was supplying new wood for residents to reinforce their homes against winter storms.

After the new wood was installed and delivered, we worked on securing sturdy canvas for the roofs and walls. In the heat of nation-wide protests and shutdowns of roads, banks, and gas stations, this was not an easy task. Fortunately, our ground team got us a good deal and the canvas was applied before the first winter storm.
